

Station Photojournalism 2021

This entry includes a variety of styles and approaches to visualization throughout 2021 – a collaboration of KXAN’s photographers, editors and multimedia journalists shooting and editing video. The images range from breaking news during a historic winter storm to high-speed law enforcement investigations to lighter moments that showcase the best of Central Texas. The goal: humanize complex stories, highlight the daily emotion for viewers and help them stay informed and engaged in new, innovative and memorable ways.

2021 Video Highlights
