## **Connect Remote Teams & Host Virtual Meetings with AJA Streaming Solutions**

For businesses and professionals working remotely, AJA Video Systems offers a range of streaming solutions to simplify professional live web streaming, online video presentations, video chats or web conferences. Host virtual meetings and events with the stand-alone H.264 streaming box AJA HELO, as well as using the AJA U-TAP for video input to a huge range of streaming/web conferencing software. The AJA Io 4K Plus and KONA 5 I/O devices work seamlessly with major streaming software packages like Wirecast and vMix for professional multi-camera streaming productions. To learn more, please see additional educational resources in a [free guide](#) developed by AJA.

The portable and standalone AJA HELO device encodes and streams H.264 from HDMI or SDI video signals, with simultaneous recording capabilities to a network share or removable media. HELO offers both 3G-SDI and HDMI source inputs in a single device with the ability to encode up to 1080p 60 in beautiful and efficient H.264. Users can stream to the CDN of choice, including YouTube, Ustream, Vimeo, Akamai, Elemental Live Cloud, Twitch and Facebook Live, while simultaneously recording to SD, SDHC or SDXC cards; USB storage; or NFS or CIFS mounted network based shares.

AJA U-TAP brings professional connectivity with high-quality video capture to any laptop or workstation, featuring affordable USB 3.0 plug-and-play SDI or HDMI for streaming. Quick and easy to install, users can connect U-TAP directly to any Mac, Windows or Linux workstation via USB 3.0, without any need for drivers, and capture video from HDMI or SDI sources. Portable and bus powered, U-TAP is compatible with a wide range of software applications and features automatic video scaling and aspect ratio conformity up to 1080p 60. Rugged and reliable, U-TAP is the ideal solution for streaming live events, webcasting, presentations and more.

For multi-camera workflows, connect multiple SDI and HDMI sources through Thunderbolt 3 with AJA Io 4K Plus or via a direct plug-in PCIe 3.0 card with AJA KONA 5. Live switch between multiple sources and add graphics and effects with support for applications including vMix or Wirecast.

For more information and free educational resources on streaming and OTT workflows, visit: [www.aja.com/solutions/streaming](http://www.aja.com/solutions/streaming)

---

In these unprecedented times, we remain committed to supporting our customers remotely to ensure they continue to receive the level of service and expertise they have come to expect from ATEME. As a software company, we are well-positioned to enable our customers to work remotely while maintaining business as usual. However, we are mindful that for many this will be a different way of working so we are taking new steps to support our customers over this period of adjustment.

As part of this, we will be hosting a series of live interactive sessions called '24h of ATEME', the first of which will take place April 15-16<sup>th</sup>. We know that our customers have different individual needs and want to ensure we understand exactly what those are and what challenges they are encountering so can remotely deliver the expertise they require.

With this in mind, we recently sent each of our customers a survey to uncover the types of support they would like to receive from us so we can ultimately help them continue to operate in the best way possible. The findings of this survey will inform the content of '24h of ATEME' during which our experts will deliver tailored communication on these topics and discuss our latest solutions and innovations to help our customers transform their video delivery.

Meanwhile, with the uncertainty around the creation of new content, key to our customers meeting audience demand in these challenging times will be to maximize their existing and archived content. Our solutions will enable them to do this, with our virtual programming tools, in particular, allowing broadcasters to quickly spin up additional channels to cater to different tastes and needs to continue to provide value for their customers at a time when many people across worldwide will spend more time in the home.

The current worldwide situation is pushing us all to change our habits and as we continue to practice social distancing, TV and OTT channels are playing an even more crucial role in our daily lives. Our mission at ATEME is to help billions of viewers across the globe to enjoy their favorite video content on their screen of choice.

During this challenging period, ATEME is offering free software video transcoding licenses for 90 days for any new pop-up channels created to help broadcasters manage the crisis. These channels can cover everything from health and news, to education, sports and entertainment using old shows or movies.

### **Beasley Media Group Boston Unveils Operation Gift Card: New England *Support Area Restaurants and Bars Scheduled to Close Tomorrow***

*Initiative part of Companywide We Are All in This Together Campaign*

**Boston, MA (3/16/20):** Beasley Media Group announces its Boston-based radio cluster is helping businesses, neighbors, and the community by unveiling **Operation Gift Card: New England** to support local restaurants and businesses located in the Greater Boston area who offer gift cards for purchase on their websites.

Part of the company's "We Are All in This Together" campaign, the stations are inviting area restaurants, free of charge, to submit links to feature their gift card pages on all Beasley Media Group Boston websites. The sites currently receive over two million page views and have 750,000 unique users on an average monthly basis.

The stations will promote *Operation Gift Card: New England* on-air, online, and across all five Beasley Media Group Boston station websites and mobile apps - [98.5 The Sports Hub/WBZ-F](#), [WROR 105.7](#), [HOT 96.9/WBQT](#), [Country 102.5/WKLB](#), [ROCK 92.9/WBOS](#).

In addition, Beasley Media Group Boston stations will support the campaign with on-air promotional announcements as well as with posts on Facebook and Instagram in an effort to promote the timely initiative.

“With local restaurants and small businesses experiencing a number of restrictions, including restaurants moving towards a take-out/delivery only model by March 17<sup>th</sup>, we wanted to show our support during these challenging times,” said Mary Menna, vice president and market manager of Beasley Media Group Boston. “Our company is committed to being there for those in need. We are all in this together!”

## **Beasley Media Group Implements Companywide Coronavirus Policy**

**Naples, FL (3/13/20):** Beasley Media Group, LLC; a subsidiary of Beasley Broadcast Group, Inc. (NASDAQ: BBGI) has implemented a companywide Coronavirus prevention policy in an effort to ensure the health and safety of its employees, advertisers and the communities it serves.

“After careful deliberation, we have taken precautionary measures that are currently being implemented across all of our markets,” said Beasley Media Group Chief Executive Officer, Caroline Beasley “The challenges we face are extraordinary, but the moment is not unique. At

our core, our company exists to serve our employees, advertisers and our communities and keep them safe and informed during times exactly like this. Broadcasters are at our best during uncertain times. We will continue to strive to be at our very best in the coming days, weeks and months.”

For the period beginning Monday, March 16<sup>th</sup> and ending Tuesday, March 31<sup>st</sup> Beasley Media Group will enact the following company policies:

Over the next two weeks, most full-time employees will be asked to telework. While some full-time employees will be needed in the office, they will be expected to follow CDC guidelines (attached) in an effort to maintain a safe and clean work environment.

In addition, the company has instituted a “no work-related travel” policy.

To limit public traffic at the radio stations, the stations will not be allowing listeners to pick up contest prize awards. Market managers will have the discretion to make limited exception instances where prizes are time limited.

Beasley Media Group will be cancelling and/or postponing events and appearances for the next two weeks to ensure not only the safety of its employees but the communities they serve.

The company will continue to evaluate and update policies as circumstances dictate.

### **About Beasley Media Group:**

Beasley Media Group (BMG), LLC, a subsidiary of Beasley Broadcast Group, Inc., is a multiplatform media company providing advertising and digital marketing solutions across the United States. BMG owns 64 radio properties located in large and medium markets across the country, as well as offers capabilities in audio technology, esports, podcasting, ecommerce and events. Beasley Media Group reaches more than 20 million consumers on a weekly basis. For more information, please visit [www.bbgi.com](http://www.bbgi.com).

In effort to pitch in and help, **CreativeReady** is working on an initiative to help radio stations navigate this uncertain time with their advertisers

The whole idea came from an RAB post titled [“It’s Not Business As Usual”](#) and specifically Erica’s advice on “Change the message.”

So we are producing a series of spots that stations can swap out their advertisers current spots with, in order to help make their messaging more relevant during this crisis.

I’ve attached a sample spot to help paint the picture, but they will basically be a PSA meets Motivation spot that can be ‘brought to you by XYZ Business.”

Assets will be made available **free of charge** for **ALL radio stations and podcasters** starting **Monday March 23rd**.

More details can be found here - <https://creativeready.com/coronavirus/>

**JAMIE APLIN // CEO**

t.free + 877.988.7225

[www.creativeready.com](http://www.creativeready.com)

I just wanted to bring your attention to a **free resource** that we have developed to help radio stations and their advertisers. It is an initiative that provides fully produced ads that are current and relevant to what we are now facing world-wide. We feel it is crucial that advertisers be changing up their current messaging.

The RAB has partnered with us along with many other media outlets to help spread the word to radio sellers and anyone who can benefit from what we are calling our **Coronavirus Campaign Series**.

Again it is **completely free** to all who can benefit and more details can be found here - <https://creativeready.com/coronavirus/>

If you feel this is something that your members would find helpful, please feel free to pass along this information.

I'm also happy to answer any questions you may have.

Thank you and please stay safe.

Jamie

Dear Customers, Partners and Industry Friends,

As businesses and families across the country follow measures to slow the Coronavirus spread, Dielectric is preparing for temporary changes to business operations. This is a rapidly evolving situation that requires a unified focus on the short-term as we work to keep employees and customers safe.

Broadcasting remains a 24/7 operation, and will be critical to providing news and information to the human population in the coming weeks. Therefore, Dielectric will remain in business, with a manufacturing staff onsite. General business operations will continue from our home offices.

We will continue to communicate with you if things change.

We wish all of you, your families and friends the utmost health and safety

A handwritten signature in blue ink, which appears to read "Keith Pelletier".

Vice President & GM, Keith Pelletier

# **DIGITAL** **RESOURCES, INC**

## Leading AV Design and Integration

Dear Valued Client,

As our communities continue to feel the increased impact of coronavirus, we want to extend our best wishes to you and your families to stay healthy and safe.

Digital Resources continues to carefully monitor the rapidly evolving situation regarding COVID-19. It is imperative for us to each do our part to minimize the impact of the disease in helping to slow the spread of coronavirus. This will save lives and avoid overwhelming our local healthcare infrastructures. We are working hard to work smart and safe while delivering the best possible services to you and your organization.

We have adapted new safety measures in place including, but not limited to:

- Continued and additional vigilance to cleanliness of our works areas
- Staff to work in smaller, specific - yet physically spread out teams
- Advise staff to wash their hands frequently
- In office staff monitoring activity of team personnel and limiting meetings or any group discussions
- Implementing the social distancing space recommendations
- Immediately send home any employees with symptoms of any kind
- Disinfect any areas of common usage ie: door knobs, handles, phones, etc.
- Clean and limit company vans to only one driver

We will remain open during this time and continue to employ our workers. While we recognize the uncertainty of the next few months, we will do our small part to keep the economy moving. We welcome jobs big and small and encourage you to get a start on projects for the summer, fall and beyond. As facilities are closed or limited on access and group sizes, now is a great time for us to complete the work in these spaces.

Other services we can provide for you during this time:

- Special PTZ camera , recording and live streaming packages
- FREE web streaming site for House of Worship entities! (*others may qualify, call us to discuss*)
- Agenda and Meeting management solutions
- Digital Signage – Affordable and easy to deploy (we can help create the content as well)
- Phone call-in to meetings/events for remote participation
- Facility AV upgrades
- Audio Upgrades and Designs

We will continue to make informed decisions following best practices recommended by health and public safety departments. We will provide timely updates through channels, including our website and social media platforms.

Please email or call us with any questions. We look forward to our communities returning to good health and normalcy.

Team Digital Resources

We are providing 24/7/365 attention to all our customers and implemented in our QC Procedures extensive hygienic measures in all our products

We have also increased our participation in Social Networks with filmed & taped presentations around the US and the World

<https://vimeo.com/397229355>

As [International Representatives of the International Exhibitors of NAB Advisory Committee](#) we are also providing [extensive coverage and follow up for Broadcasters of the US and the World](#)

---

## **COVID-19 VIRUS: TEMPORARY OPERATING PROCEDURES**

INOVONICS IS OPEN FOR BUSINESS, BUT TAKING PRECAUTIONS

Posted on March 19, 2020

---

First and foremost, we hope that you are staying safe and have been able to avoid exposure to the Coronavirus (COVID-19). The situation is very fluid and changes each day.

It is during difficult times like these when people turn to radio for critical information. Which is all the more reason to keep calm, use best practices and **STAY ON THE AIR**. The world needs you...

We wanted to let our customers know that Inovonics is still open for business to handle your orders and provide the support you have come to rely on. At the same time we have implemented some precautionary measures to insure the health and safety of our employees.

As of today, most of our personnel are working remotely and we are operating on a skeleton crew in the office to minimize physical contact, thereby reducing the chances of the spread to ourselves and our loved ones.

The good news is that currently Inovonics has an ample supply of inventory and can manage your orders without difficulty. We will process your orders in a timely manner, although you may experience short delays due to limited personnel in the office.

The best means of communication is via email. Please use these email addresses to contact Inovonics:

- For PO's and Sales/Marketing matters: [sales@inovonicsbroadcast.com](mailto:sales@inovonicsbroadcast.com)
- Tech Support: [tech@inovonicsbroadcast.com](mailto:tech@inovonicsbroadcast.com)
- Repairs & RMA's: <https://www.inovonicsbroadcast.com/support/processRMA>

We will keep you updated as things change on the ground. Thank you for your support and stay safe.

---

**Need To Run Your Board Remotely? We Can Help.**

---

We've heard today from several stations who are preparing contingency operations due to COVID-19, so we wanted to reach out to everyone to make sure you are aware of the methods you can use to remotely manage your Logitek system or even operate the board remotely if circumstances warrant.

1. Every JetStream system ships with an embedded PC running LogMeIn. We use this to remotely support you. If you would like access to your machines using LogMeIn, we can send an invitation for you to log into the machines that you own. Just email [john@logitekaudio.com](mailto:john@logitekaudio.com).

2. Every JetStream system has a license for vMix+. Contact us for a vMix+ design file that creates a virtual console for your station. There is no additional charge for this; the license was built into your JetStream Mini and JetStream Plus.

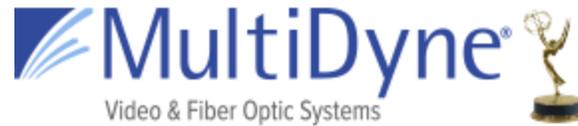

3. Once you've set up a virtual console in vMix+, you can either connect to your internal LAN via a VPN or set up port forwarding on your station's firewall to allow access to the Logitek vClient port. This would allow an operator who can't be at the station to run the board remotely.

If any of these ideas sound good to you, just call (713) 664-4470 or email [john@logitekaudio.com](mailto:john@logitekaudio.com) for help implementing them.

In a time of global pandemic, your audience counts on you, and you can count on us to help you in any way that we can so you can serve your community.

---

---

“MultiDyne Video & Fiber Optic Systems is currently adhering to guidelines set by the Centers for Disease Control (CDC), and state and local guidelines in New York for protecting our employees during the Covid-19 Pandemic.

Please know our company sales team is currently operating from home office locations, and additional staff that can work from home are now set up and functional. We are respecting the travel ban and until such time when it is safe to move around, we will support your requests by telephone or conference calls.

Our manufacturing team is continuing operations in very sanitary factory conditions while maintaining social distancing. We are continuing production to satisfy the needs of our loyal customers. We will notify you if a shipment is delayed and will try our best to maintain delivery expectations.

Thanks for your patience and understanding and we all hope and trust this epidemic will pass quickly.

-- Bob McAlpine, COO, MultiDyne

Dear NAB Show Community,

The COVID-19 pandemic has created a truly unprecedented situation around the world. Our thoughts are with those who have been directly affected by the virus, and all of those who are struggling with the ramifications of this global health crisis.

At the National Association of Broadcasters, we believe it is our responsibility to help stop the spread of COVID-19, and put the health and safety of our show community first. In the week since announcing that we will not move forward with the NAB Show in April, the landscape has continued to shift dramatically with major sports leagues, school districts, and other businesses around the country suspending operations. The governor of Nevada has also made the decision to close all nonessential business operations in the state. National authorities are imploring Americans to telework wherever possible.

While we recognize that much of our show community is focused on other issues at the moment, we have heard from many of you over the last week who are eager for an update on our plans.

For that reason, we wanted to convey now that, in light of the current circumstances, it is impossible to hold a rescheduled 2020 NAB Show this year. We will instead proceed with a two-pronged approach to deliver as much value as possible under these circumstances to our exhibitors, partners, and the broadcast industry as a whole.

First, we are exploring a number of ways to bring the industry together online, both in the short and long term. We know from many years of serving the community with face-to-face events, that connectivity is vital to the health and success of the industry. That's why we are excited to announce NAB Show Express, targeted to launch in April 2020. This digital experience will provide a conduit for our exhibitors to share product information, announcements and demos, as well as deliver educational content from the original selection of programming slated for the live show in Las Vegas, and create opportunities for the community to interact virtually—all of which adds up to something that brings the NAB Show community together in a new way.

Second, we will be enhancing NAB Show New York with new programs, partners, and experiences. We have already had numerous conversations with show partners about expanding their participation, and have heard from numerous exhibitors interested in enhancing their presence at this fall's show. NAB Show New York represents the best opportunity for companies to announce and showcase their latest innovations and comes at a perfect time for the industry to gather face-to-face to restart, refocus, and reengage as we move forward together.

We will have more to say about these efforts in the coming weeks. This is a unique and challenging situation, but we are committed to working hard to deliver as much value as possible.

We're also committed to being an active part of the solution to the current crisis in the months ahead. Last week we launched a new [public service announcement campaign](#) on radio and television that will provide crucial information to keep communities safe. The PSAs are part of a comprehensive Coronavirus Response Toolkit that we have made available online to help broadcasters accurately cover the pandemic and prepare for the threat it poses to their staff, communities, and businesses. We'll be doing more in the weeks to come to harness the power of our industry as a force for good in these difficult times.

As we move forward, we will keep an open line of communication with our show community, and look forward to engaging with you throughout the year. We've already begun planning for our

2021 NAB Show in Las Vegas, which will take place April 11-14, and we hope you'll join us then, as well as this fall.

We look forward to connecting with you, and hope that you and your loved ones remain safe in the months to come.

Best,

A handwritten signature in black ink, appearing to read "G. H. Smith". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Gordon H. Smith  
President and CEO

---

Dear Valued Client,

In the current environment with concerns around the increased impact of the Coronavirus (COVID-19), we feel it's important to assure our customers and our employees that NVerzion is taking every measure to ensure the well-being of each person we come in contact with during our course of business.

We are following updates and guidelines suggested by the CDC, Health Dept and other appropriate agencies.

Our offices are open during normal business times and we can be reached 24/7 in the case of an emergency - (801) 293-8420.

For well over 30+ years, NVerzion has been providing engineering excellence to our customers. We know we will get through this together and we look forward to continuing to provide a safe experience for you.

We will continue to stay connected with you on any updates.

Please do not hesitate to reach out to us for any help we can provide.

Sincerely, NVERZION.

---

Dear Valued Client:

As our communities continue to feel the increased impact of coronavirus, we want to extend our best wishes to you and your families to stay healthy and safe.

We are seeing more stations that are being forced to manage their stations remotely, implementing the social distancing space recommendations. NVERZION's Automation system provides excellent tools for managing remote record and playout management. The challenge you might be faced with is the ability to Preview, Trim and Segment content without physically being at the station. We do have a magnificent software tool which does provide this ability right from your remote computer screen and hear the audio on speakers as well. The NFinityView software can be installed on your existing NVERZION Automation system depending on the vintage of the Windows OS.

Not to mention, we can install and train you on this new software with little to no onsite assistance. If this might be of interest, please reply back to me in an email and I will be happy to provide you with pricing.

Thanks, and again stay safe.

Sincerely, NVERZION

---

As the exclusive Energy Consultant to the Texas Restaurant Association, and the largest group being affected by COVID-19, here is how we are helping them.

- Seeking payment relief from monthly electricity bills from their electricity Suppliers
- Invoking the Force Majeure clause of their electricity contracts, on behalf of the restaurant owner, so they can avoid under-usage charges relative to their contracted usage requirements.

Both things will save the restaurant industry millions of dollars. If there are TAB members whose usage, in some way were affected by COVID-19, we could do the same for them. Please let me know should you have any questions. Thank you!!

Sincerely,  
Tom Kinser

**RADIOMAX™**

The Mobile App for Independent Radio Stations

Chicago, IL  
18, 2020  
FOR IMMEDIATE RELEASE

March

**RadioMax To Provide a Free Mobile App to Any Station in Need of One, During This Crisis.**

**RadioMax**, a leading mobile app technology provider for the commercial radio industry, has announced it will provide, free of charge, a mobile app to any station in need of one to better help serve and inform their listeners and community during the coronavirus pandemic. No

strings attached, no commitment, no agreement to sign...nothing. As the concern centering around COVID-19 (Coronavirus) continues to rise, stations just need to let RadioMax know they need an app, and RadioMax will get one in operation as soon as possible.

John Wanzung, CEO of RadioMax: “As this situation develops, people are going to be turning to radio for information. As more and more people stay at home, not spending as much time in their cars over the next several weeks, we want to give stations and their listeners an additional way to stay connected and informed via a mobile app. The current situation is an opportunity for all of radio to rise to the occasion to inform and support our communities, and on 3/13, RadioMax started working with stations currently without a mobile app to provide them a complimentary mobile app for free through June 1, 2020.”

As reported by the Federal Communications Commission (FCC), when a disaster occurs, citizens depend upon local broadcasters for access to lifesaving public safety and emergency announcements. The important role of local broadcasters, especially radio, is critical. Moreover, radio remains the top medium in the United States, reaching more Americans than any other platform at an astounding 92% of U.S. adults every week.

**RadioMax**'s mobile platform allows stations to connect with listeners in real time, providing a comprehensive listener experience with real-time interaction for the most up-to-date information.

**For stations in need of a mobile app and how to get it set up, please visit [www.radiomaxapp.com](http://www.radiomaxapp.com)**

### **About RadioMax**

Based in Chicago, Illinois, **RadioMax** is a mobile app focused on independent radio. **RadioMax** provides an affordable full featured mobile solution for radio stations that includes a number of highly innovative features not found on any other platform. The app offers real-time chat between the on-air personalities and the listeners, social media integration, a dynamic programming schedule that allows users to view all programming and specialty shows – all with mobile alerts, polls & contests, and many other features. Additionally, **RadioMax** provides stations with a robust administrative dashboard, enabling them to coordinate every aspect of their app along with access to valuable user analytics.

### **News from San Antonio based RollTechs Specialty Vehicles:**

We are pleased to announce the return of Ron Laurence to our firm. Ron will serve in a vital role where his expertise in building custom vehicles for broadcasters and other industries will help guide the firm towards expanding in this market further. He will concentrate on a sales role, but certainly his experience in design, fabrication, and support will play a major role between the firm and its customers. Many of you will remember Ron was with Shook Mobile Technology for nearly 15 years before taking a two year break to pursue other ventures. His return last month was welcomed by his RollTechs teammates, and the many customers and suppliers that have known him all these years. Please join us in wishing him a happy return. Feel welcome to reach out to Ron at [RLaurence@RollTechs.com](mailto:RLaurence@RollTechs.com), or call him at 210-861-4547.

Tony Beigel  
General Manager  
RollTechs Specialty Vehicles

---

### **News from RollTechs about shop capability during the COVID 19 pandemic:**

Our shop remains open and very active as our fabricators typically work individually (not paired up) so they can easily maintain Social Distancing suggested by CDC. Plus our shop has very large doors that are open all day allowing lots of thru ventilation. Of course the warmer days of Spring also help to combat the virus. We instruct our team members to stay home if they feel any signs of illness, especially fevers and coughs. So far, the entire work force is doing fine.

We receive vehicles in for service and repair every week, plus of course we're actively building many new vehicles each day.

RollTechs Specialty Vehicles (previously Shook Mobile Technology) is still located in Northeastern San Antonio and going strong after over 40 years of supporting Broadcast vehicles throughout Texas and the nation. We plan to attend TAB and hope to see Texas Broadcasters at the show.

Meantime, if any repairs, or modifications, are needed on any TV stations' vehicles (regardless of original manufacturer), we're here to help. We are authorized to support all the major components found on broadcast vehicles including Generators, Pneumatic Masts, HVAC systems, etc. We are of course very good with electrical systems, Nycoils, Pan & Tilts, Jacks/Stabilizers, and AV systems.

Give me a shout if we can be of any assistance to our broadcast community.

Thanks,  
Ron Laurence  
210-861-4547 cell  
210-651-5700 x619 office

Tieline's expert tech support team is busy helping broadcasters get their talent set up so they can broadcast from home and other remote locations during the coronavirus crisis. Please note:

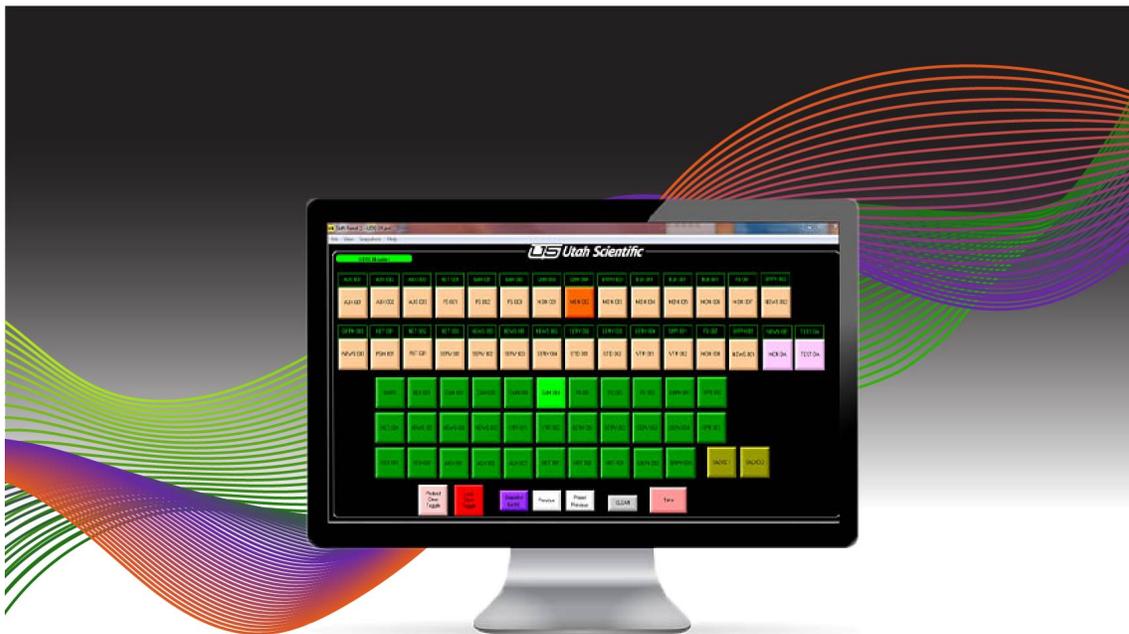

- Tieline is activating Report-IT orders as a priority during normal office hours to assist broadcasters to go live remotely as soon as possible.
- We are offering full tech support on codecs as usual.
- Our manufacturing plant is still open and manufacturing codecs.
- The Indianapolis office is still open and working normal hours but equipped to work from home if necessary.
